General Skills: Interpersonal Communication Skills, Object Oriented Programming, Functional Programming, Problem-Solving and Debugging, API Design and Development

Tools: Git, Github, Bitbucket, JIRA, Postman, MS Office, Webpack, Bootstrap, AgGrid

Experience

Full Stack Developer | Inland Engineering Services - Corona, CA | 01/2023 - Current

- Engineer responsive user interfaces for an internal project management system using **HTML**, **CSS**, **JavaScript**, and **ReactJS** as our UI library.
- Implementing complex features with state management using **useContext**, **useState**, **Redux**, and custom **hooks**, resulting in enhanced user experience and streamlined data handling.
- Building internal component library using **higher-order components** to ensure reusability and consistency of functionality across the application.
- Develop and maintain robust back-end services with **ASP.NET Framework**, including comprehensive **CRUD** operations and building **REST APIs** for complex data querying.
- Design and implement database schemas using **SQL Server**, focusing on flexibility and scalability to accommodate evolving business requirements.
- Utilize **EntityFramework** for efficient data access and management, ensuring seamless integration with front-end components.
- Utilize various public **REST APIs** such as Microsoft's GraphAPI to build tools to automate processes.
- Work with user base to build features that meet their needs and requirements.

AutoCAD Drafter | Inland Engineering Services - Corona, CA | 01/2022 - 01/2023

- **CAD Drawing Development:** Produced detailed **AutoCAD** drawings from various inputs, ensuring adherence to project specifications and customer requirements for accuracy and quality.
- **Customization and Process Improvement:** Employed **AutoLISP** and **VBA** to enhance **AutoCAD** functionality with custom commands, optimizing the drafting process and improving efficiency.
- **Data Management and Reporting:** Analyzed CAD data to create comprehensive reports, facilitating project tracking and decision-making processes.

Section Leader | Trader Joe's - Cerritos, CA | 04/2015 - 07/2022

- **Interdepartmental Problem Solving:** Collaborated with various departments to address and solve operational challenges, contributing to the overall functionality of store processes.
- **Customer Service and Complaint Resolution:** Provided stellar customer service and resolving complaints, ensuring a positive shopping experience and maintaining professional standards.
- **Data Analysis and Inventory Management:** Analyzed sales data to forecast stocking needs, optimizing inventory levels and contributing to the section's profitability.

Education and Training

Cerritos College | Norwalk, CA
Computer Science
